Word Cloud Pedagogy

[13th Sept by SHPS]

Generation of Word Cloud

Affordances of Word Cloud

Integration of Word Cloud

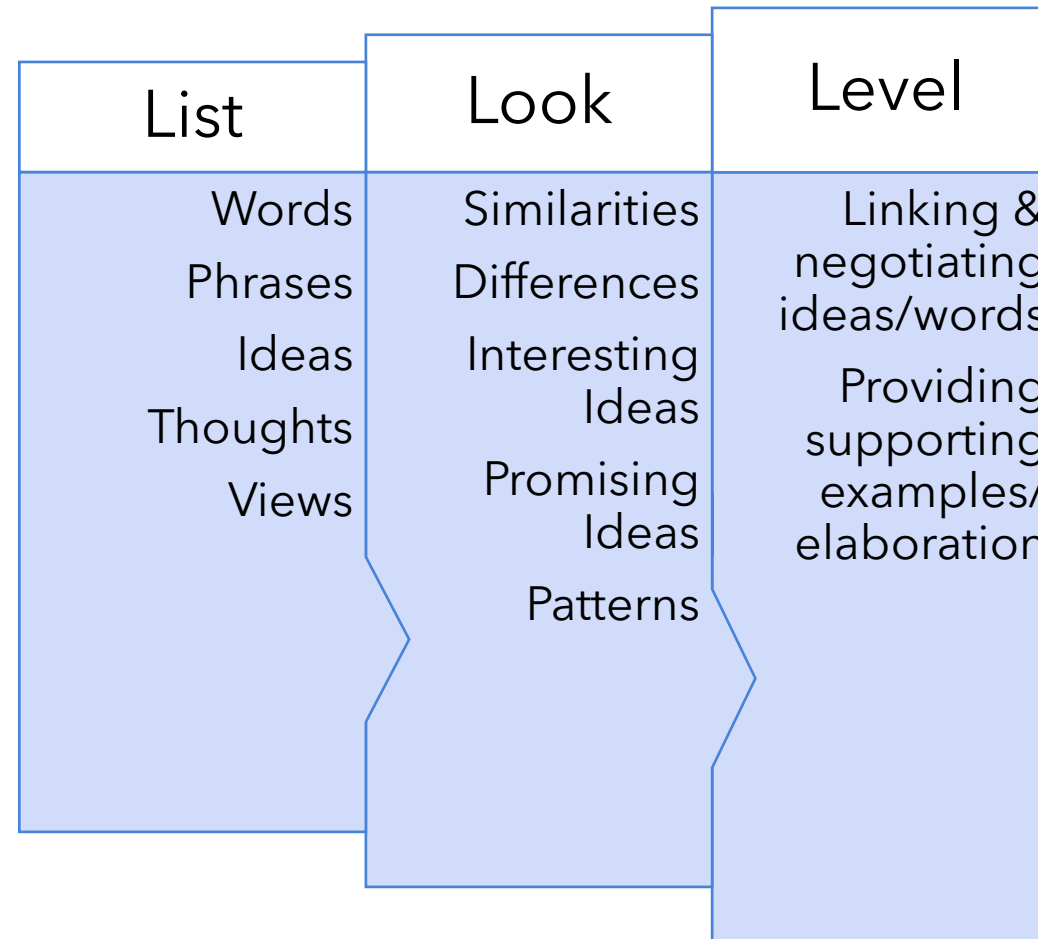

Considerations

Idea Generation

Idea Development

Idea Reflection

Idea 1: List (down) - Look (out for) - Level (up)

Idea 1: List (down) - Look (out for) - Level (up)

List down 1 word or phrase that describes an event/ character/ issue/ phenomenon/ your feelings from the film

Look out for words (size matters too) that caught your attention

Level up by thinking of examples that can support this word/phrase

List down 5-8 words that you think is important to show that you understand the chapter (within a stipulated timing)

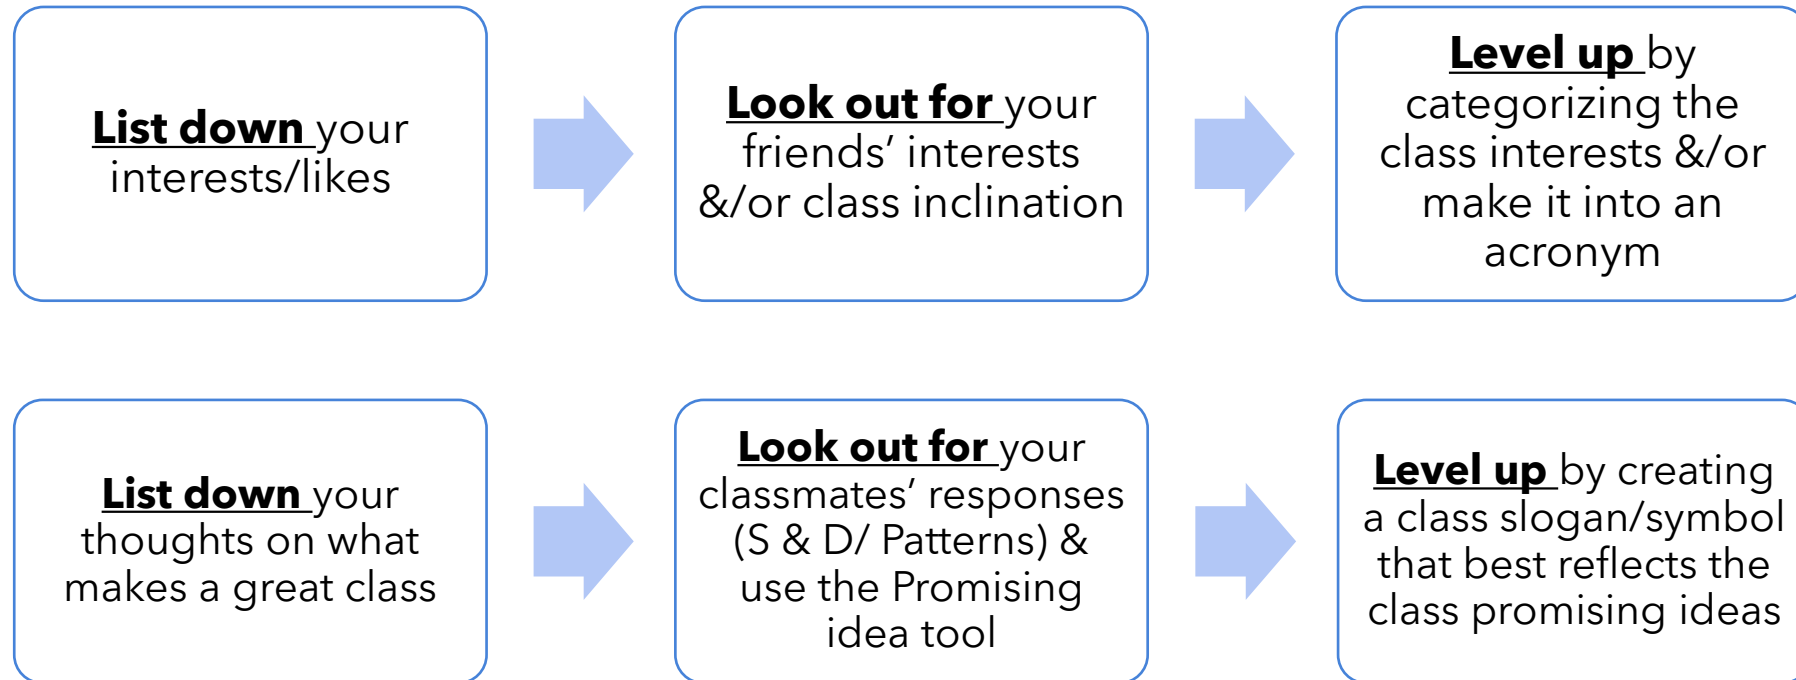

Look out for words (size matters too) that you did not list it down/ differs from yours

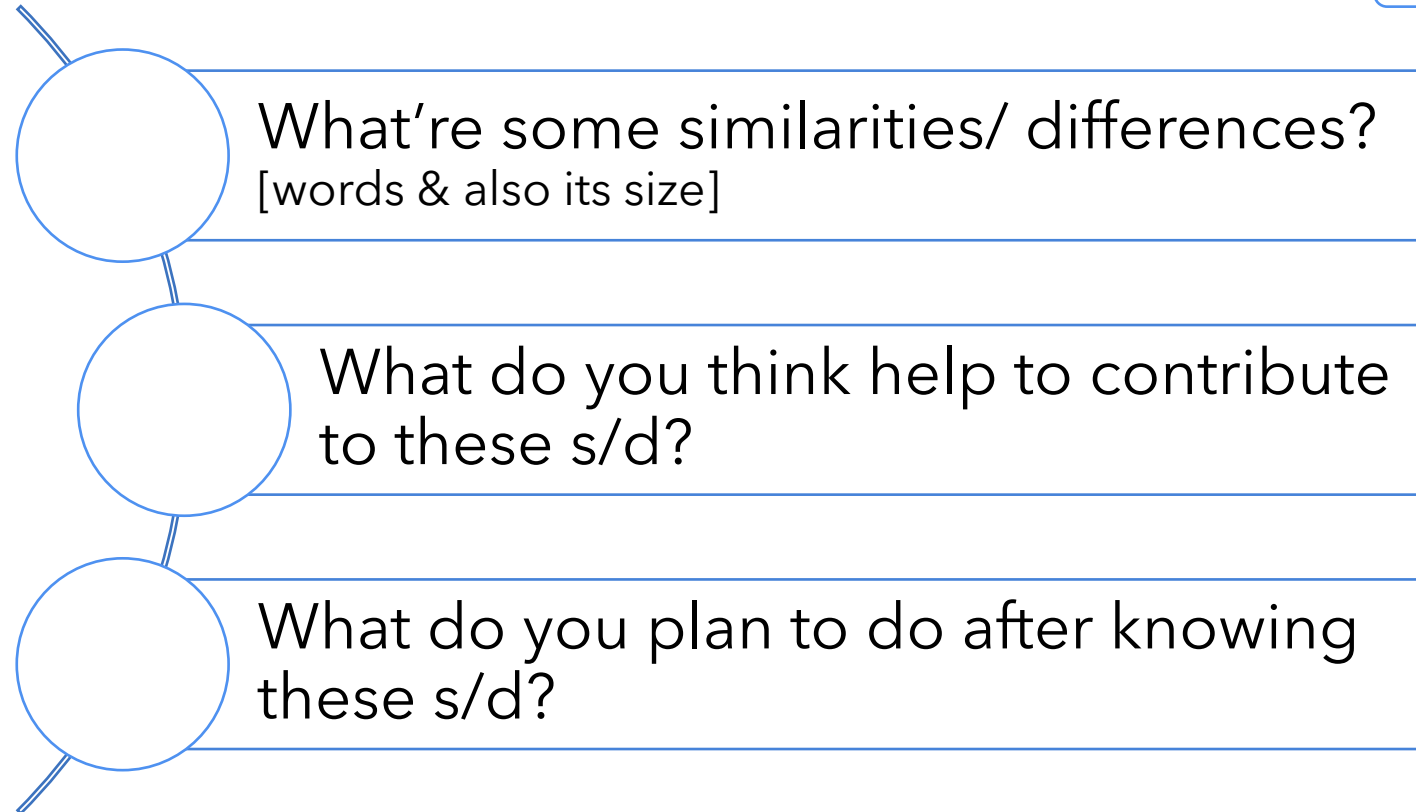

Level up by re-considering & re-negotiating with your earlier entries/inputs (you can choose to talk to a friend/teacher/refer to TB/research online...)

Idea 1: List (down) - Look (out for) - Level (up)

Idea 2: Identify – Inquire – Integrate

Useful & Practical?

Areas to build-on/ strengthen/ enhance?

How do you think it will look like in your classroom?

Possible subjects' application?

Any new thoughts/ ideas?

Thank you 😊
